EDUCATION

Certificate in Full-Stack Web Development

CareerFoundry

April 2024 - October 2024

Intensive project-based program focused on HTML, CSS, JavaScript, and key libraries, frameworks, and tools. Projects:

- Pokédex**

Built a JavaScript app to load data from an external API, display a list, and show item details upon interaction, using HTML, CSS, and JavaScript.

View project here: alexuflexu.github.io/simple-js-app/

- myFlix API**

Developed a server-side API for a movies app using Node.js, Express, and MongoDB with user authentication and CRUD operations.

View project here: github.com/alexuflexu/movie_api

- myFlix React**

Created myFlix-client, a frontend application for browsing movies, managing profiles, and maintaining a favorites list using React, React Bootstrap, Redux, JavaScript (ES6+), and SCSS. View project here: silent-movies.netlify.app

- Meet App**

Built a serverless PWA using React and AWS Lambda, with city-based event search, event filtering, offline support, and data visualizations using TDD.

View project here: alexuflexu.github.io/meet-app/

- Chat App**

Designed a mobile messaging platform built with React Native and Firebase, enabling real-time communication, image and location sharing, and offline functionality.

View project here: github.com/alexuflexu/chat-app

MA in Film Studies

University of Łódź

October 2012 - June 2018

PERSONAL PROJECTS

E-Commerce Shop

November 2024 - February 2025

- Launched and managed an e-commerce store, developing and implementing strategy, including product design, pricing, promotions, and legal compliance documentation.
